- 5) Library Material

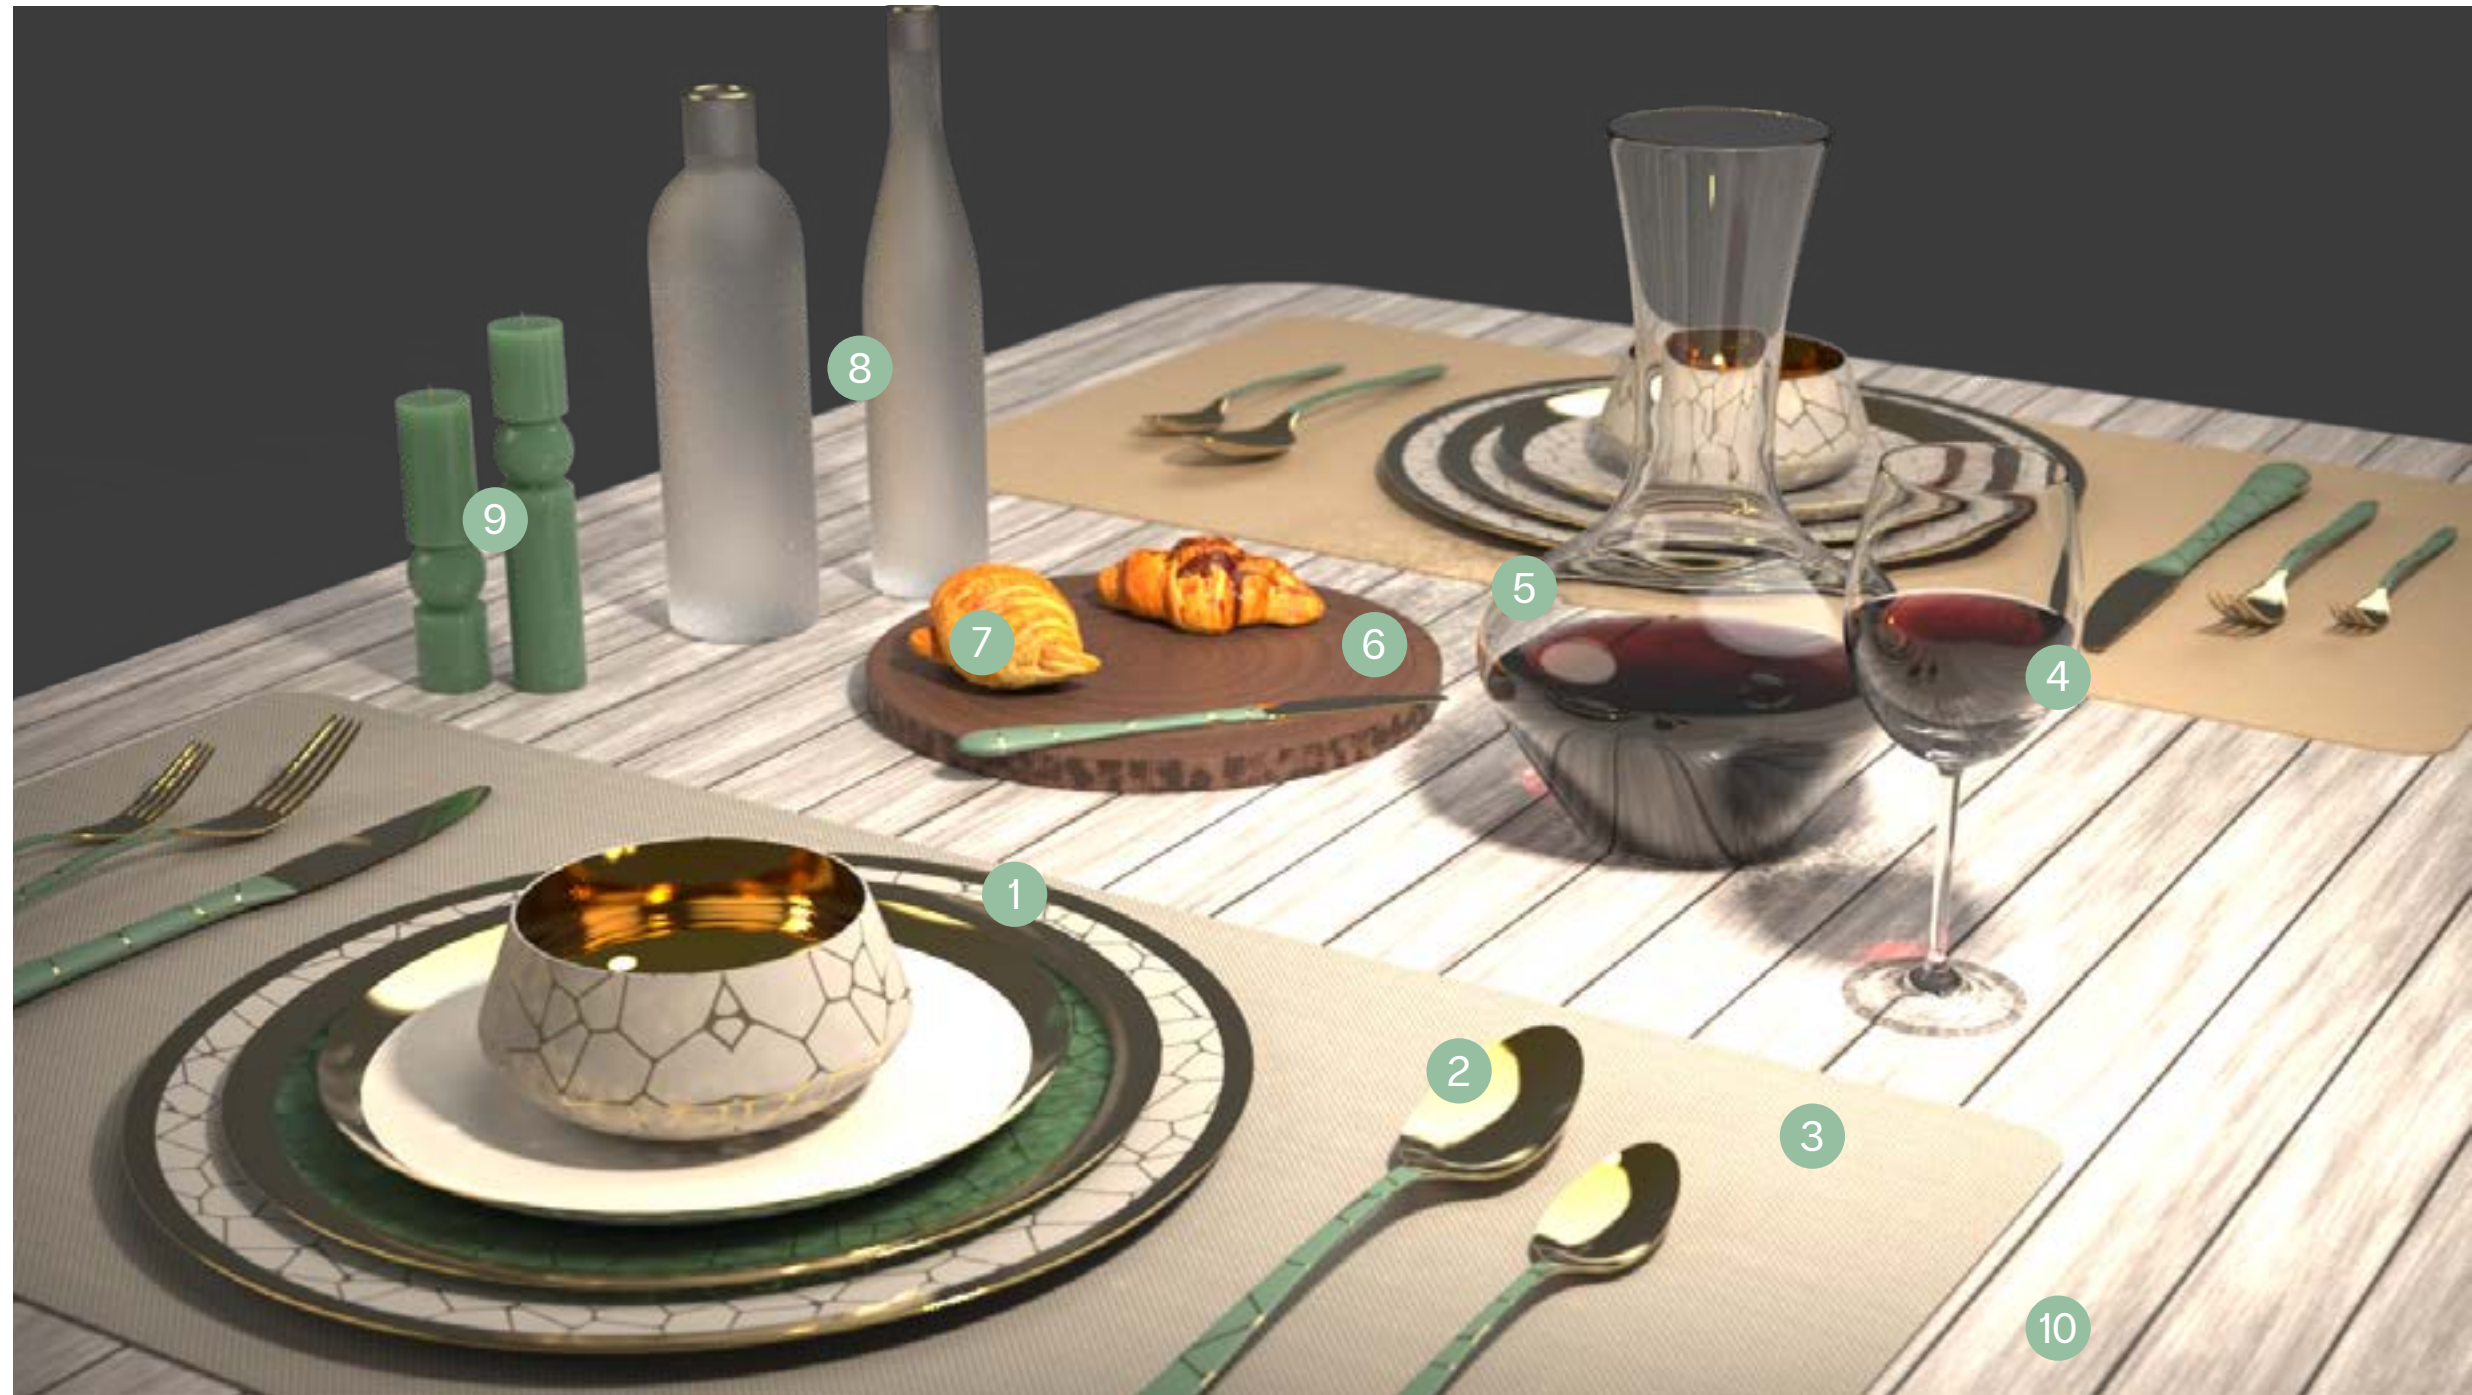

- 6) Custom Material
- 7) Library Material
- 8) Library Material
- 9) Custom Material
- 10) Caustic Effect

Light Sources: Custom HDRI & Area Light
 Render Settings: 1600 x 900 px
[Texture Used](#)

The screenshot displays the Adobe Color 'Extract Theme' tool interface. At the top, the navigation bar includes 'Adobe Color', 'CREATE', 'EXPLORE', 'TRENDS', and 'LIBRARIES'. The main navigation tabs are 'Color Wheel', 'Extract Theme' (selected), 'Extract Gradient', and 'Accessibility Tools', with a 'New' button. A 'Replace Image' button is located in the top right. On the left, the 'Extract using Color Mood' section is active, with 'Colorful' selected. The central image shows a green-themed still life with a plate, glass, and leaves. Below the image, a color palette is displayed with five color swatches and their corresponding hex codes: #BFD9C8, #95BFA0, #77A67E, #FFFBF9, and #F2CF8D. On the right, the 'Save to' dropdown is set to 'Your Library', the name is 'color theme_here', and there are tags for 'Blue +', 'Green +', 'Cream +', 'Brown +', and 'Baby +'. A 'Publish to Color' toggle is turned on, and a 'Save' button is at the bottom right.
